WORK EXPERIENCE

React Js. Developer

Insightmobi Solutions Pvt Ltd, Bangalore

Aug 2021 - Jan 2024

PROJECT:

"Elegant Management"

- Identify and fix frontend-related bugs, issues.
- FE Technology: HTML5,CSS,Bootstarp 4, JavaScript, React
- Implement proper error handling to avoid exposing sensitive information that could be used by attackers to exploit the application.
- Implemented Google Maps in your web application using the "google-maps-react" npm package.
- I worked on Redux with Redux Thunk middleware in this project.

SUMMARY

The Elegant Management System project is a web based application that allows the hotel manager to oversee all hotel activities from a single location. Room booking, staff management, and other hotel management services are included in this project. The manager can use the system to advertise available rooms.

ROLES & RESPONSIBILITY

- Designing UI's part by using HTML, CSS and React JS.
- Creating reusable front-end components for future use.
- Involved in the performance optimization of a web application.
- Used postman to test the API integrating Restful APIs by axios.
- Exposure to Agile methodologies and JIRA project management software.
- Maintained code by using versioning technologies like Git and Gitlab to keep track of changes.

PROJECT:

"Alliance Builder"

- Identify and fix bugs reported by users or discovered during testing. Analyse and debug issues to find the root cause and implement solutions.
- Contributing in all phases of the development lifecycles.
- Added searching and filter functionality.
- FE Technology: HTML5,CSS,Bootstarp 4, JavaScript, React

SUMMARY

The purpose of the Alliance Builder is to keep track of the specifics of a resume, Job, individual, skills, and qualification. It keeps track of all resume, jobseeker, Qualification, and resume-related information. Only the administrator has access to the Project because it is entirely constructed at the administrative level.

ROLES & RESPONSIBILITY

- Designing UI's part by using HTML, CSS, Material Ui & React.
- Structure and configure project.
- Write high quality code with react & Redux. .
- For effective state management, I worked on Redux.
- Set up my project development environment with the necessary tools, including code editors, version control, and package managers.
